

September 20, 2019

Dear Parents/ Guardians,

COAST is going to offer an after-school tutoring program for math, reading and science. Registration is open to all 2<sup>nd</sup> - 8<sup>th</sup> grade students. There are 24 spots available for this program so student selection will be prioritized based on those in most academic need first. The program will be October 1<sup>st</sup> through December 19<sup>th</sup>, Monday through Thursday from 3-5pm. We will have two more after school sessions this year January through March and March through May. Specific dates and details will become available later. Students selected to participate will be provided a snack and limited bus transportation. Bus routes cannot be determined until we have received all letters back, but we anticipate community bus stops.

It is important that if you agree to this, your child attend every session that is offered in order to receive the full benefit of the instruction as it is an ongoing process of learning. Please make the commitment to allow this program to be a priority for you and your child. Students with excessive absences will be removed from the after-school program.

Return the registration below to school by Wednesday, September 25, 2019 to confirm your child's place for this important educational opportunity.

Sincerely,

Jeffrey LaChapelle
